Community Health Needs Assessment
Implementation Strategy
2017-2019

SANF: RD

dba Sanford Mayville Medical Center EIN # 45-0228899

Dear Community Members,

Sanford Mayville is pleased to present the 2016 Community Health Needs Assessment and Implementation Strategy. There is great intrinsic value in a community health needs assessment when it serves to validate, justify and defend not-for-profit status and create opportunity to identify and address community health issues.

During 2015 members of the community were asked to complete a survey to help identify unmet health needs. Analysis of the primary research data and secondary research was used to identify health concerns and needs in the community. Community partners assisted with the development of an asset map that lists resources and assets that are available to address each need. A gap analysis and prioritization exercise was also conducted to identify the most significant health needs, and to further address these needs through the implementation strategies that are included in this document.

Sanford Mayville has formalized strategy to address the following community health needs:

- Physical Health
- Mental Health Services

In this report you will find the implementation strategies for 2017-2019, information about what Sanford is doing to address the needs, assets and resources that re available in the community to address the needs, and a discussion on the impact from the 2013 implementation strategies.

At Sanford Mayville, patient care extends beyond our bricks and mortar. As a not-for-profit organization, ensuring that the benefits of health care reach the broad needs of communities is at the core of who we are. Through our work with communities, we can bring health and healing to the people who live and work across our communities. Together, we can fulfill this mission.

Sincerely,

Roger Baier

Roge Bare

Chief Executive Officer

Sanford Medical Center Mayville

Implementation Strategies

Priority 1: Physical Health in the Community

- Obesity and inactivity are closely linked. Keeping active can help people stay at a healthy
 weight or lose weight. It can also lower the risk of heart disease, diabetes, stroke, high blood
 pressure, osteoporosis, and certain cancers, as well as reduce stress and boost mood.
 Inactive (sedentary) lifestyles do just the opposite.
- The World Health Organization, the U.S. Dept. of Health and Human Services, and other authorities recommend that for good health, adults should get the equivalent of two and a half hours of moderate-to-vigorous physical activity each week. Children should get even more, at least one hour a day.
- Sanford has prioritized physical health and has set measurable outcomes as a baseline for
 weight and periodic measurement, education session participation and exercise
 participation. The Sanford Health fit program is available to all classroom teachers and
 includes four areas of focus; nutrition, activity, behavioral health and sleep. The program is
 available to promote healthy lifestyles in homes, schools and daycares.

Priority 2: Depression

- Depression is a common but serious illness that can interfere with daily life. Many people
 with a depressive illness never seek treatment. But the majority, even those with the most
 severe depression, can get better with treatment. The North Dakota Department of Health
 reports that 14% of residents in Traill and Steele counties have reported fair or poor mental
 health days.
- Sanford has prioritized depression as a top priority and has set strategy to perform
 assessments for depression in the primary care setting and to improve PHQ-9 scores for
 patients who are diagnosed with depression. The goal is to improve PHQ-9 scores for
 patients with depression. The measurable outcome is the percentage of patients with major
 depression or dysthymia and an initial PHQ-9 score greater than nine whose six-month
 PHQ-9 score is less than five.
- Sanford Health will continue to provide a directory of services for community members.

Community Health Needs Assessment – Implementation Strategy

Sanford Mayville Medical Center

FY 2017-2019 Action Plan

Priority 1: Physical Health

<u>Projected Impact</u>: Nutrition and Physical activity program are available for community <u>members</u>

Goal 1: Improve the availability of programs for nutrition education and

Actions/Tactics	Measureable Outcomes	Dedicated Resources	Leadership	Note any community partnerships and collaborations (if applicable)
Work with local city government, public schools and university to develop city-wide walking trails	 Baseline measurement for weight is established and evaluated quarterly Participation in the exercise programs, walking logs, etc. 	City facilities such as sidewalks, school track, University health education class, etc.	Sanford nutrition, exercise staff, MSU, public health, schools and city leadership	Public schools Mayville State University City of Mayville and Portland Traill Health District

Demonstrating Impact

The following unmet needs were identified through a formal community health needs assessment, resource mapping and prioritization process for 2013:

- Mental Health Services
- Services for the Elderly
- Dental

2013 Implementation Strategy: Mental Health Services

- Define services currently available
- Define mechanisms to educate service area
- Define education process and secure outside resources
- Develop directory with resources and outsource information
- Distribute directory to various groups, entities and secure email addresses and updates
- Participate in Sanford One Mind as determined by the enterprise three-year plan

2013 Implementation Strategy: Services for the Elderly

- Update directory of available services
- Print/distribute

2013 Implementation Strategy: Dental

- Determine specific needs through collaboration with county agencies
- Request assistance from AHEC to determine directory availability
- Determine how to market the needs among various organizations
- Distribute finished directory product
- Ongoing process monitoring the needs and services

The 2013 implementation strategies have served a broad base of our community and region. The impact has been positive and the work will continue into the future through new or continued programming and services.

Impact of the Strategy to Address Mental Health Services

Sanford Health completed an inventory of services that are available in the area to address mental health needs. A directory was developed for the purpose of making the information available to the members of the community. The directory was updated in 2015 and will be updated again in 2016.

Revised copies of the mental health resource directory have been made available to public health and community members can obtain a copy at the hospital. Copies will also be distributed to area senior centers during 2016 and at the health fair/education blitz.

Impact of the Strategy to Address Services for the Elderly

Sanford Health completed an inventory of services that are available to meet the needs of seniors in the community and rural areas. A directory was developed for the purpose of making the information available to the members of the community. The directory was updated in 2015, and was added to the mental health services directory.

Revised copies of the mental health and services for the elderly resource directory have been made available to public health and community members can obtain a copy at the hospital. Copies will also be distributed to area senior centers during 2016 and at the health fair/education blitz.

Impact of the Strategy to Address Community Collaboration

Sanford Health works in collaboration with AHEC to implement Scrubs camps and allow job shadowing of students who are planning to attend college for healthcare careers. The Scrubs camp is held at Sanford Mayville Medical Center and the program has full attendance each year.

Sanford Health leadership worked with the City Council to discuss key issues that were discovered through the 2013 CHNA survey process. As a result of the discussion with city leaders, Sanford has expanded tele-medicine services for psych and sleep medicine. Additionally, cardiac rehab has expanded to congestive heart failure services and a cancer survivorship program was added. Podiatry service is a new outreach in the clinic.
