Sanford Medical Center Wheaton
Community Health Needs Assessment
Implementation Strategies
2014-2016
Dear Community Members,

Sanford Wheaton has conducted a community health needs assessment (CHNA) and formally identified unmet needs in the community. A component of the 2013 CHNA work is a perception survey.

During FY 2012/2013 members of the community were asked to complete a survey to help Sanford identify unmet health needs. Sanford analyzed the survey data, identified unmet needs, and partnered with key community stakeholders to develop a list of resources and assets that were available to address them. A gap analysis was also conducted to identify the most significant health needs, and they were addressed in the implementation strategy that is included in this document.

Sanford Wheaton has set strategy to address the following community health needs:
- Transportation
- Mental Health Services
- Recruitment of Physician

Sanford is also addressing mental health services and obesity through enterprise-wide implementation strategies. The enterprise strategies are included in this for your review.

Additionally, the asset map/resource list is included in this document along with the action steps that will be taken.

At Sanford Wheaton, patient care extends beyond our bricks and mortar. As a not-for-profit organization, ensuring that the benefits of health care reach the broad needs of communities is at the core of who we are. By working with communities, we can bring health and healing to the people who live and work across our region. Together, we can fulfill this mission.

Sincerely,

JoAnn Foltz
CEO
