Article Guidance

Article Text:

The following coding and billing guidance is to be used with its associated Local Coverage determination.

To report a multiplex PCR respiratory viral panel service, please submit the following claim information:

- If the panel being used does not have its own proprietary CPT® code, use CPT® code 87631, 87632 or 87633.
- If the test does have a PLA code then submit the appropriate code.
- Per the MolDX: Multiplex Nucleic Acid Amplified Tests for Respiratory Viral Panels LCD, tests that include more than 5 viral pathogens are non-covered. Included in this are 87632, 87633, and additional PLA codes listed in the *CPT/HCPCS Codes Group 2: Codes* section of this Billing and Coding article.
- Enter 1 unit of service (UOS)
- Select the appropriate ICD-10-CM code

A DEX Z-Code™ identifier is not required for multiplex PCR respiratory viral panel testing. If submitting a DEX Z-Code™ identifier, please submit following the below instructions:

- Enter the appropriate DEX Z-Code™ identifier adjacent to the CPT® code in the comment/narrative field for the following Part B claim field/types:
 - Loop 2400 or SV101-7 for the 5010A1 837P
 - Item 19 for paper claim
- Enter the appropriate DEX Z-Code™ identifier adjacent to the CPT® code in the comment/narrative field for the following Part A claim field/types:
 - Line SV202-7 for 837I electronic claim

Coding Information

CPT/HCPCS Codes**Group 1 Paragraph:**

Covered under limited circumstances. May only be billed in places of service 20, 21, 23, or 81 (Urgent care, Inpatient hospital, or Emergency room, or Independent Laboratory respectively).

Outside of one of these places of service, these tests must be ordered by an infectious disease specialist who is diagnosing and treating the beneficiary. An exception may be made in geographic locations where no infectious disease specialist can be reasonably reached by the beneficiary and the ordering provider is located closer to the beneficiary's place of residence than the nearest infectious disease specialist. We would generally expect that beneficiaries for whom the test is ordered under this exception to be living in rural locations, islands, or some other location where access to care is limited.

Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the policy, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.
