Dear Colleague,

I am excited to share that we are in the planning phase for development of a Postgraduate Year Two (PGY-2) Clinical Pharmacogenomics Residency at Sanford Imagenetics planned to be offered for the 2021-2022 residency year.

Sanford Imagenetics serves a large rural population with 45 hospitals and 289 clinics in nine states. Sanford Imagenetics is seeking ASHP pre-candidate/candidate status for a PGY-2 Clinical Pharmacogenomics Residency beginning in 2021 and will follow the ASHP Residency Learning System. Our program will be designed to provide structure and development of personal and professional goals that will provide a successful residency experience. A research project will be completed during the 12 month residency.

The resident will have opportunities to teach pharmacy students from several Colleges of Pharmacy as well as precept PGY-1 residents completing a pharmacogenomics elective.

Residents will be provided health insurance, dental insurance, life insurance, and 20 days of paid time off (includes sick days). The stipend is competitive and updated annually. Residents will receive expense coverage to attend the ASHP Midyear Clinical Meeting plus the Midwest Pharmacy Residents Conference to present their research project.

Information on how to apply for the PGY-2 Clinical Pharmacogenomics Residency with Sanford Imagenetics will be available in August of 2020.

An on-site interview in Sioux Falls, South Dakota will be required for qualified applicants. Interviews will be conducted in January or February. If you have any questions, please feel free to contact me anytime.

Thank you,

Natasha Petry, PharmD, BCACP
PGY-2 Pharmacogenomics Residency Director
Sanford Imagenetics
Assistant Professor of Practice – North Dakota State University
