Sponsored by: Sanford USD Medical Center
Perinatal Nurse Fellowship

Objectives

• Review and apply labor support techniques.
• Identify appropriate nursing interventions related to breastfeeding.
• Differentiate between reassuring and non-reassuring FHR patterns; discuss nursing management of non-reassuring patterns.
• Identify the most common risk factors in pregnancy.
• Describe nursing interventions related to assessments of the mother and newborn.
• Identify contributing factors and treatment plans of postpartum period.
• Identify physical and emotional symptoms that might reflect domestic abuse.
• Describe the case of the diabetic patient throughout the pregnancy.
• Identify newborn risk factors and clinical findings which may indicate a problem during the transitional period.
• Identify the emotional and physical impact of perinatal loss.
• Discuss the role of the RN in OB anesthesia.
• Discuss the role of the peri-operative L&D nurse in providing safe patient care.
